

“Growing People into Leaders, Building Communities through Love, Transforming the Nation!”

## **Programmers Wanted**

We are embarking on inventing new cutting edge applications to enable leadership development to grow in an exponential way in every organisation. If you are a creative and highly skilled programming person who lives and breathes programming language, who wants to put to use the latest high powered programming tools into your work of art, we want to meet you:

You will:

- Create new innovative applications and online networks that makes learning fun for people of all ages and makes the user experience an exciting, friendly and easily contagious trend.
- Create simulation learning games that showcases AI to the world
- Develop Social Networks that is the pillar of the physical networks for youth and corporate
- Listen, Capture and Design internal and external clients’ thoughts to bring to life their ideas into a workable, commerciable application that revolutionizes the way things are done.

You must:

- Be someone who loves fun, knows how to have fun and knows how to incorporate fun in your applications.
- Be able to see BIG PICTURE of the internal/external client’s design and able to break it down to the detailed mechanism behind the entire design to help your clients achieve their goals.
- Be adept in ER-modelling, database design, programming language and coding.
- Be able to engage, influence and convince different stake holders, i.e. corporate, service providers, trainers, youth leaders etc.
- Have a flair of creativity, ability to conjure new ideas, daring to try new revolutionary concepts... all within a reasonable budget of course (ie, commercial viability)
- Be Proactive & Initiative and Able to work independently with minimal supervision
- Be able to communicate comfortably at least in English, Bahasa Malaysia and more.

- Be able to deliver and execute on commitments.
- Have at least 2 years experience
